I have installed jenkins on ec2 instance. when i try to configure my public github repo with the ec2 instance then it throwing the **error**: \*Failed to connect to repository : Error performing git command: git ls-remote -h \*\*public github url \*\*\* HEAD

I reinstalled the git plugin as well but it won't work. I added credentials as well(hope not required for public git repo). Any possible solution?

yes Git Plugin is installed in Jenkins – [Andy](#) Jun 23, 2022 at 17:18

@Andy this could be a connectivity issue as well then. Have you tried accessing Github from EC2 Instance itself? Are there any firewalls blocking the connectivity? – ycr 🌟 Jun 23, 2022 at 17:30

---

- 2 yes I got the answer. I haven't installed the git over my ec2 instance. Once I installed it then the error gone. thanks @ycr – Andy Jun 23, 2022 at 17:55
